

MOVABLE PLATFORM

Modular stage systems are designed for any environment and application. From simple risers for small indoor performances to complex staging for large outdoor events.

Lightweight decks are manufactured using custom extruded aluminium space frames, built for maximum strength and rigidity (up to 750 kg/m²). The low-profile construction produces low dimensional volume, making storage and transportation logistics easier.

A wide range of accessories are available to create catwalks, raised seating areas, and more so even a complex setup need not be complicated. Accessories include stairs, hand-rails, chair stops, and carts for storage and transportation.

Dimension - 1000x2000mm
Height - 200 to 1500mm
Max Load - 750kg/m²
Top - 15mm plywood anti-slip
Weight - 35kg
